

DOG FIRST AID TASMANIA

IF YOUR DOG WAS INJURED,
WOULD YOU KNOW WHAT TO DO?

DOG FIRST AID HEADS NORTH

Veterinarians will be conducting workshops explaining how you can apply First Aid to sick and injured dogs

This is a practical, no-nonsense workshop. We will look at the signs and symptoms of the most common issues vets see with dogs and what to do in each situation such as:

- Handling an emergency
- Handling distressed animals
- What to do if your dog is hit by a Car
- Signs of shock and assessing the patient
- Controlling bleeding and bandaging
- Fight wounds and what to do when dogs are fighting
- CPR
- Broken Bones
- Poisoning
- Tick bites & other bites and stings
- Snake bites
- Heat stress & Choking
- **AND MUCH MORE**

Quotes from participants as seen on Facebook

“Thank you so much for organising the workshop. The organisation and the presentation were both particularly well done, and much appreciated. So many great pieces of advice about when to call or get to a vet, and what is possible or appropriate to do in the meantime”

An amazing, well organised course. Very informative for both dog guardians and dog professionals. I hope I never have to use most of what I learned but will be prepared if I ever do. Thanks Marea and team
