"Lottie"

Excited to share the news that Lottie gained her Track & Search Dog Grand Champion Title and earned the title of Dual Grand Champion, the first Weimaraner in Tasmania. This is the third dog sport title Lottie has gained in 2025 also achieving Rally Advanced (RA) and Trick Dog Novice (TK.N).

Lottie gained her first dog sport title in 2021 Tracking Dog (TD) since then she has gained 19 titles in six disciplines; Conformation, Tracking, Track & Search, Scent Work, Rally Obedience and Trick Dog. Making history along the way for the breed not only in Tasmania but in Australia. The first Weimaraner in Tasmania to have gained Scent Work Novice (SWN), Trick Dog Starter (TK.S) and Trick Dog Novice (TK.N) titles. Lottie is the first Weimaraner in Australia to achieve both conformation Grand Champion and Neuter Grand Champion Titles. Lottie is currently the most titled Weimaraner in Australian history.

A special thank you to Sue Shrigley for breeding such a versatile Weimaraner with a beautiful and loving temperament. I will be forever grateful to you, for taking a chance on me ten years ago and allowing me to bring Lottie my first dog into my life. I will be forever owned by a Weimaraner.

PRESIDENT'S REPORT

Hello everyone.

The busy time of the year is with us with Royal Shows happening in multiple states. The start of the local agricultural show season and trials in many disciplines, occurring in all areas has members busy with preparation and training. The work involved in organising and holding these events is enormous and as mentioned in my previous reports volunteers are always welcomed at club level in all disciplines, so if you are able to help in any way please offer your assistance.

Candidates have been working diligently in various judges training schemes. I wish them well as they approach their final exams and practical assessments.

I remind members of the importance of adhering to regulations and code of ethics. With animal welfare and dog management policies under review at both local and state government level, our organisation is in my view, a shining light. We are a self regulated body with a strict code of ethics, and this sets us apart from the practises of many unscrupulous breeders and organisations that continue to attract the attention of the public for all the wrong reasons. Keep up the good work!

As we look towards daylight savings and with one eye dare I say it looking towards Christmas, take care, and good luck in your chosen disciplines.

Until next time

Steve Eastley, President

Australian National Kennel Council Limited ABN 77 151 544 679 trading as Dogs Australia

PRESS RELEASE

Dogs Australia Breeding and Surgical AI Statement

Dr Karen Hedberg (BVSc) Sydney
Chairperson
Canine Health & Wellbeing Committee

Dogs Australia Breeding Statement

Currently, under Dogs Australia regulations, the following regulations are in place:

No bitch is permitted to be bred under the age of 12 months.

No bitch is permitted to be bred over the age of 8 years unless a veterinary certificate of health is produced.

Larger and Giant breeds (>25–30kg adult weight) may have additional restrictions of 18 months as the minimum breeding age.

The maximum number of litters for a bitch's lifetime is five.

The maximum number of litters in an 18-month period is two.

The above National Dogs Australia minimums are enforced in individual states, but state and government territory restrictions also apply over and above these requirements.

Artificial Insemination (AI) in Dogs

General information

AI is used in dogs for several reasons. Typically, AI is used for bitches that may not be able to mate with another dog physically. In some circumstances, the dog may be interstate or overseas based, in which case AI may be the most practical option. Males and females can have fertility issues but still be genetically valuable to small gene pools. Alternatively, the dog may be physically incapable of mating the bitch. It can include bitches that have difficult internal anatomy (including congenital strictures) whereby normal mating is not possible, and other AI techniques are either less or not likely to be successful (including TCI). The semen may be fresh, chilled or frozen, depending on the circumstances and availability.

Australia, being an island continent relatively isolated from the main breeding centres (Europe and the Americas), is highly dependent on the use of frozen semen to bring in new bloodlines so that breeds maintain genetically healthy and diverse populations. There are difficulties in transporting dogs both within and to/from Australia. The ability to travel with live dogs due to long flights and immigration requirements is very restrictive, particularly for giant breeds. Further, many brachycephalic breeds are currently banned from air transport altogether.

Frozen semen has been the main means of importing new bloodlines in most breeds for the last 30–40 years. The Greyhound industry has been and still is heavily reliant on the use of frozen semen, with over 80% of breeders using frozen semen as the main means of getting bitches pregnant.

Within the Dogs Australia pedigree dogs, old stores of semen are often used to bring forward older lines/traits that would otherwise be lost.

Frozen semen has a very short post-thaw lifetime (around 12 hours). Results of the use of frozen semen show that the thawed semen must be placed intrauterine for successful conception. The amount of frozen semen required is 100 million live sperm per breeding unit (straws or pellets). When using TCI (transcervical insemination), 200 million live sperm is recommended. Coupling surgical insemination with the use of progesterone blood level testing of the bitch to identify conception times has greatly enhanced the success when using frozen semen over the last 10–15 years.

Canine Anatomy and Follicle Maturation

It should be understood that dogs have very different anatomy of the cervix from standard farm animals, and artificial insemination of fresh semen will only deposit semen into the vestibule of the cervix. Semen can only be deposited directly through the cervix with the use of rigid image scopes (TCI). Not all bitches can be successfully scoped.

Additionally, the follicles of dogs, unlike those of many other species, require a further 48–72 hours after ovulation to undergo final maturation in order to be fertilized. This requires the timing of insemination to be very precise if you wish to be successful, particularly when using frozen semen. Add to this the variable quality of the semen provided, and the results can be highly variable unless all involved in the collection, storage, and insemination are quite skilled in all areas.

Standard AI with fresh semen

The majority of standard AI's in dogs are carried out using catheters to deposit semen into the vestibule of the cervix. This technique is quick, takes about five minutes and is suitable for most bitches with the use of fresh semen and correct timing.

Bitches with a history of infertility require further examinations as to the reasons for the apparent infertility. Poor semen (and poor frozen semen) from the dog may also require the semen to be deposited directly into the uterus.

Transcervical Insemination (TCI)

Over the last 20 years, a more recent development, TCI, allows bitches to be inseminated while awake and standing. There are, however, restrictions to this technique.

1. The amount of live semen required is doubled (200 million live sperm per insemination)
2. Bitches may need sedation for this technique. Despite this, some bitches cannot be successfully catheterised and still require a surgical insemination.
3. The equipment used for the insemination has been limited in its use in the smaller breeds.
4. No training courses for the correct technique have been available in Australia until very recently. It requires a lot of experience to get increased success and reduced times.
5. Insemination times can vary from as short as 10 minutes to over 30 minutes by which time concerns over the continuing viability of the thawed semen increase. Semen is not usually thawed until after the catheter has reached the uterus.
6. Some bitches can become distressed and require heavy sedation to continue.

Surgical AI

1. This can be done within 10–15 minutes, much shorter than a standard spay operation.
2. The surgical site is minimal 1–2 inches maximum. Drugs can be given to minimise any pain.

3. The uterus and ovaries can be examined at the same time if required.
4. Half the amount of live sperm is required.
5. Semen that has been in cold storage for years was originally purchased on the basis of needing 100 million live sperm per insemination.
6. Older stores of semen cannot be changed. Accordingly, if any restrictions are imposed, a grandfather clause should apply to its use regardless of any newer restrictions on the use of surgical AI (e.g. Any such restriction does not apply to semen collected before 2024).

As can be seen from above, the reasons for the use of artificial insemination depend on a number of factors. The reasons for the use of surgical insemination can vary considerably depending on location, practicality of collection from the dog, the best interests of the bitch (including breeding history) and the amount and quality of the semen available.

Conclusion

The veterinarian treating the bitch should have the right to use the best technique available to obtain success with due consideration of all the factors and what is in the best interests of the animal's welfare.

This is also important in maintaining genetic diversity, which may be critical in maintaining the health of certain breeds, particularly rare breeds.

Tasmanian Junior Handler State Final - 7 June, 2025

**Overall Winner and First Place

**Overall Runner Up and First Place

Junior Handler Competitors and Judge Ms C. John

Wow what an amazing State Final and congratulations to all the Junior Handlers who made it to the day. They all did an amazing job and should be so proud of your efforts. All handlers displayed great skill in very challenging weather; their sportsmanship was exemplary as was their own attitude towards the day, and the overall qualifying year. All exhibitors should all be commended.

You can't have a final without a Judge, so a big thank you to Christina John. When others were looking for a dry room and warm soup you continued with your appointment with a smile and encouragement. As Chairperson of the Junior Handler Committee for 2025, I would like to thank the hard-working committee, Trudi, Yvonne, Rachael, Loretta, Jess, and Katelyn, for all their input and dedication throughout 2025. Thank you to the clubs that have so generously scheduled heats for us at your shows throughout the year. Thank you to the owners of swap dogs and thank you for those that have allowed juniors to handle your dogs during the year.

A special "thank you" to our generous sponsors:

BlackHawk, Moorholme Pet Transport, Loretta Jones and Jason Gesiotto from Bellasamba Samoyeds, Melissa Donaldson-Hey, Jodi Fraser, Debbie Veevers, Ruth Davis, Spurius Kennels and Yvonne Metzger.

Club News . . .

WESTBURY AGRICULTURAL SOCIETY INC

WASI welcomes all kennel exhibitors and friends to our back to back All Breeds 2025 shows.

The early start 8.30am was well received last year, so this year will be like 2024 with the new "show dogs' entrance", just for us in Taylor Street, which runs straight into the usual car park. A Westbury Showground map is below. As per last year, there will be signage.

The Junior Handlers' Heat (plus Tiny Tots) will be held during the lunch break. All handlers will receive a gift kindly donated by **Bendigo Bank**. WASI appreciates their continued sponsorship over the past many years, and thank them greatly.

Passes no longer will be sent out. As you enter you will be marked off a list by a gate official. Gates will open at 6.30am. Same exhibit numbers for both shows are to be collected behind the office (as usual).

Annie's Alfresco Kiosk will be well-stocked with her many homemade and yummy delights. Hot and cold food, and drinks at reasonable prices. Cash only. Please call by and say hello to her, and the ladies.

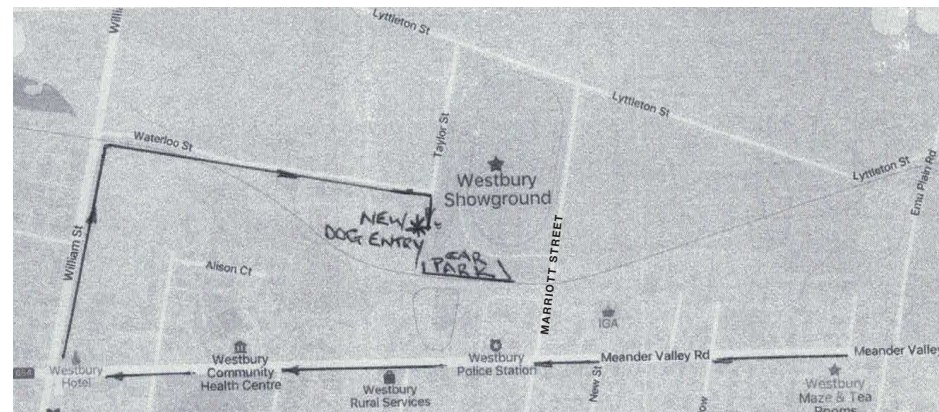

Our judges are looking forward to meeting and judging our show dogs – good luck to all.

We look forward to your entries.

Any queries please phone me, Pamela Summers (Kennel Co-Ordinator) on 0439 338 634.

Happy showing and safe travels
